SUMMARY

Senior React Native and Expo developer based in Cairo. I've spent the last five years building production iOS and Android apps, usually as the only mobile engineer on each project. That means everything from the first commit through App Store and Play Store launch, including the post-release crash work and rejection cycles that take longer than the original build. Recent work has been in AI-integrated mobile, healthcare and telehealth, real estate, and marketplaces. Comfortable across Supabase, Firebase, and GraphQL.

EXPERIENCE

Senior React Native Developer — FIXA

Jan 2025 – Present

Car services marketplace with AI diagnostics, parts e-commerce, and Elasticsearch-powered search across service centers.

- Developed AI-powered issue identification and camera-based tire size scanning, taking users from problem photo to booked diagnostic in one flow.
- Built Elasticsearch-backed parts search and discovery across listings, replacing slow keyword matching with relevance-ranked results.
- Architected feature-first clean architecture for modular, testable code across the platform.
- Implemented diagnostics tracking and push notifications keeping users updated on service progress and parts availability.

Senior React Native + Expo Developer — Fitra360

Jan 2026 – Present

AI-powered wellness platform that analyzes DNA, bloodwork, symptoms, and lifestyle data to generate personalized health and routine plans. Currently in final testing phase before launch.

- Built the consumer mobile app for AI-driven personalization across nutrition, fitness, and lifestyle recommendations.
- Integrated structured DNA and bloodwork data ingestion with conversational AI to generate individualized plans.
- Designed offline-first architecture with MMKV persistence and Zustand for fast cold-starts and resilient sync.

Senior React Native Developer — Gayar

Feb 2022 – Jan 2026

Kuwait's first car parts marketplace. Maintained in production for nearly 4 years.

- Built and shipped iOS and Android apps from launch through 4 years of production use.
- Integrated TikTok, Snapchat, Meta, and Google Analytics SDKs for full-funnel event tracking and conversion attribution across paid channels.
- Shipped deep-link marketing campaigns routing users from ad creative directly into product listings, lifting paid acquisition conversion.
- Iterated on search, listings, and checkout based on conversion and retention data.

Senior React Native Developer — WZGate

Dec 2024 – Jan 2026

Mobile development agency shipping production iOS and Android apps for direct clients across real estate and pet care.

- Niche Real Estate: Property discovery app with deep-link routing from marketing campaigns into specific listings, interactive map-based search with location filters, and an in-app AI assistant for buyer queries.
- Shari Real Estate: Premium real estate app with map-based search, listing discovery, and AI-assisted property recommendations.
- PetWell: Pet care app with clinic discovery, appointment booking on a GraphQL backend, and digital pet health records.

React Native Developer — Nile University

Jul 2023 – Dec 2024

Two shipped apps for Nile University: the official student-facing app and an internal campus security app.

- Shipped the official Nile University iOS and Android app with role-based access for students, staff, and visitors.
- Built Nile Gate, the internal campus security app for visitor registration, campus entry management, and event tracking.

React Native Developer — Thought Craft

Feb 2023 – Mar 2024

White-label telemedicine platform developed as both a standalone consumer app and as an embeddable module inside health-insurance partner apps.

- Architected the white-label system so a single codebase could ship as a standalone app or embed inside an insurer's existing app, with theming, auth, and routing all swappable per deployment.
- Integrated Zoom SDK for live doctor-patient video consultations, including session lifecycle handling, in-call prescription generation, and mid-call access to patient medical history.
- Shipped the full patient journey on iOS and Android: appointment scheduling, push reminders, the video consultation, prescription generation, and post-consult record review.

React Native Developer — ValuePlus

Dec 2021 – Jan 2023

Saudi enterprise ERP suite: dual mobile apps for POS + inventory and HR + attendance, deployed across multi-branch retail.

- Shipped ValuePlus POS with high-speed barcode scanning, real-time stock management, and multi-branch sales reporting dashboards.
- Built ValuePlus HR with geofenced attendance tracking, digital employee profiles, and self-service request and approval workflows.
- Delivered real-time inventory alerts and operations dashboards used across retail locations.

SKILLS

Mobile: React Native, Expo, TypeScript, JavaScript (ES6+), iOS, Android, App Store and Play Store submission and rejection handling

State + Performance: Zustand, Redux Toolkit, MMKV, offline-first architecture, profiling, memory and rendering optimization

Backends: Supabase (auth, RLS, realtime, storage, edge functions), Firebase (Auth, Firestore, Realtime DB, Analytics), GraphQL, REST

Native + Integrations: Deep linking, push notifications, Reanimated, Lottie, geolocation, geofencing, maps, in-app purchases, native modules

Architecture: Clean architecture, feature-first structure, SOLID, MVVM, modular system design, error boundaries

Tools: Git, GitHub, GitLab, TestFlight, basic CI/CD

Languages: Arabic (Native), English (Fluent)

EDUCATION & CERTIFICATIONS

Bachelor of Engineering — Cairo University, 2023

JavaScript Algorithms and Data Structures — freeCodeCamp, 2021

Nanodegree in Frontend Development — Ministry of Communications and Information Technology, Egypt, 2021
